Description

Summary of the Bug

When you try to transfer from account you don't have it gives a message Invalid account type. Would be clearer if it said you didn't have an account of that type

Initial State of the System

Application is running, ran by double clicking.

Steps To Reproduction

1. Turn ATM on by pressing bottom right button
2. Input any cash amount for ATM
3. Input card number 2 and pin 1234
4. press 3 for transfers
5. press 2 to transfer from savings
6. press 1 to transfer to checking
7. enter amount
8. See screen after attempt

Expected Outcome

- Should say you don't have a saving account“

Actual Outcome

- Invalid account type

Description

Summary of the Bug - When withdrawing more money than the system has, \$20 is still withdrawn

Initial State of the System - System is on, card has been inserted

Steps To Reproduction

1. When prompted to pick the total amount the system has, put in 8 (\$160 the system will have)
2. Insert card number 1
3. Type correct PIN number 42
4. When choosing a transaction type, pick "Withdrawal" by selecting 1.
5. Select 1 for the "Checking" account
6. Select 5 to withdraw \$200

Expected Outcome - The system should displays an appropriate message and asks customer to pick a different amount

Actual Outcome - \$20 is withdrawn from the account
